

# CHEVROLETS TO RACE ON INDIANA TRACKS

---

The Chevrolet Motor Company the last week shipped a Chevrolet racing car to Indianapolis to William Small, distributor for the state, the car to be used by William Brown of Fort Wayne in the dirt track races around the Indiana county fairs.

And the dirt track races in Indiana are more general than the Speedway race bugs have any idea. This race car was especially built at the factory, and made to compete with cars of more power and larger ones around the dirt track circuit.

Though this kind of racing receives nothing but local publicity, generally in the form of an added thriller to the county fair hair-raisers, there is much of it done in Indiana.

There will be two Chevrolets racing in Indiana as a team under Small's direction—Brown's car and one to be driven by William Doughty of Bluffton, who last year was a most successful pilot on the dirt tracks.

The announcement comes from the A. A. A. of the reinstatement of Arthur Chevrolet, brother of Louis, and he, like Louis, is anxious to get back in the racing business. Arthur was suspended for competing in an unauthorized hill climb at Newport, Ind., last fall, in which he won six silver cups in his Chevrolet.
